Core Competencies for Today’s Healthcare Workforce

Curriculum Outline

DESCRIPTION

The transformation of New York State’s healthcare system to care coordination and care management delivery models requires new core skills and competencies across many frontline healthcare workers, including care coordinators, care managers, patient navigators, community health workers, health educators, medical assistants, patient care technicians/associates, nurses, and home care workers. While many of the specific job responsibilities and titles of these roles vary across institution, setting, and patient population, there is a large consensus in the field and a growing body of literature to support that healthcare workers practicing in these models have overlapping functions and should have a core set of skills and competencies.

In order to support the workforce development field in delivering education programs that prepare the current and future workforce with the skills now required by healthcare institutions to deliver patient-centered coordinated care, the New York Alliance for Careers in Healthcare (NYACH) and its Partners Council set out to identify and build consensus around the core competencies required for practicing in today’s healthcare environment. This core curriculum outline— which includes nine core competencies with accompanying topics and learning objectives - is intended to serve as an industry-designed framework for educators and trainers to build off of, with the final curriculum ultimately tailored to the specific occupation, student population, and geographic and institutional setting that the program is intended for. The goal in providing this framework is that any student completing an education/training program designed to prepare workers for employment and practice in care coordination delivery models should possess these critical core competencies and skills.

This curriculum outline is a framework for designing a new course module titled “Introduction to Core Competencies for Today’s Healthcare Workforce” to be incorporated into many allied health education and training programs. Furthermore, this outline should serve as a roadmap to embedding and reiterating core competencies throughout the entirety of a course (i.e. person-centered care and communication) and to expand in further detail depending on the occupation the training is preparing the student for (i.e. chronic disease management for health coaches). This program is intended to be taught through a learner-centered teaching approach incorporating roleplays, case studies, and other interactive activities into the course.
DEVELOPMENT, INPUT AND VALIDATION PROCESS

This core curriculum was developed through the NYACH Partners Council. The development consisted of recommendations based on research and a literature review conducted by the Greater New York Hospital Association, and input from the following Partner organizations:

- 1199SEIU Training and Employment Funds
- Community Healthcare Association of New York State
- City University of New York
- Greater New York Hospital Association
- Paraprofessional Healthcare Institute
- Southern New York Association

Additionally, the curriculum outline was reviewed and contributed to by the NYS Department of Health DSRIP/SIM Workforce Workgroup Subcommittee to Identify Recommended Core Curriculum for Training Workers in Care Coordination Titles. Members of this group include:

- Center for Health Workforce Studies, University at Albany School of Public Health
- Fort Drum Regional Health Planning Organization
- Office of Academic Health & Hospital Affairs, State University of New York

This recommendation is closely aligned to the version being considered by the NYS Department of Health DSRIP/SIM Workforce Workgroup.
SUMMARY

Below is an index of the core competencies and accompanying learning topics covered in this curriculum outline. Each core competency represents a course module and each learning topic –of which includes 2-4 learning objectives – ultimately should be tailored and customized based on the focus of the program.

1. Introduction to New Models of Care and Healthcare Trends
   a. Overview of the US healthcare system
   b. Introduction to care coordination
   c. New models of care

2. Interdisciplinary Teams
   a. Working on interdisciplinary teams
   b. Building positive relationships on a team
   c. Communication with team members
   d. Participating in team huddles
   e. Dealing with team conflict

3. Person-Centeredness and Communication
   a. Defining person-centered care planning
   b. Recognizing family and patient needs
   c. Communication and patient engagement techniques (part 1)
   d. Communication and patient engagement techniques (part 2)
   e. Health literacy

4. Chronic Disease and Social Determinants of Health
   a. Overview of chronic disease and co-morbidities (part 1)
   b. Overview of chronic disease and co-morbidities (part 2)
   c. Social determinants of health
   d. Self-management

5. Cultural Competence
   a. Recognizing patients’ families’ cultural needs/factors that may affect their choices or engagement
b. Communicating with patients and families in a culturally competent manner
   c. Recognizing and acting on potential biases in an appropriate manner

6. Ethics and Professional Boundaries
   a. Ethical and responsible decision-making
   b. Professional boundaries

7. Quality Improvement
   a. The quality improvement process
   b. Quality improvement methods and processes

8. Community Orientation
   a. Connecting patients and families to community resources
   b. Supporting families as they seek resources in the community

9. Health Information Technology, Documentation and Confidentiality
   a. Basic technology skills and the electronic health record
   b. Documentation
   c. Confidentiality and guidelines
**CORE COMPETENCY 1: Introduction to New Models of Care and Healthcare Trends**

**Module Overview:** This module provides an overview of the U.S. healthcare system and the goals of healthcare reform, both at the Federal and State level. It focuses on new models of care, an introduction to care coordination, and the changes in the way that healthcare is being paid for and delivered. Students will gain an understanding of the Triple Aim and how the system is being transformed in order to reach this goal.

<th>Topic</th>
<th>Learning Objectives (Students will be able to…</th>
<th>Resources</th>
</tr>
</thead>
</table>
| Overview of the US healthcare system and payment system | • Describe the types and interrelationships of healthcare facilities, services, and personnel  
• Understand the basics of Medicare, Medicaid and private insurance as well as the basics of managed care organizations, capitation, value-based payments and their purpose in healthcare reform  
• Understand how healthcare reform will impact the delivery of healthcare services  
• Describe the values and assumptions that underlie the changing priorities in healthcare delivery and financing | Care Coordination Fundamentals: Module 1, 1199SEIU Training and Employment Fund (1199SEIU TEF) and Primary Care Development Corporation (PCDC) |
| Introduction to care coordination | • Understand what coordinated care looks like  
• Identify the goals of care coordination based on the appropriate level of care needed for the individual and/or population being served  
• Describe the roles and responsibilities of healthcare workers in care coordination models  
• Understand commonly used terms in care coordination.  
• Describe strategies that may support high quality care as a means to improve population health | What does Coordinated Care Look Like?, Institute for Healthcare Improvement (IHI)  
Care Coordination Fundamentals: Module 1, 1199SEIU TEF and PCDC |
| New models of care | • Understand the Triple Aim  
• Describe new models of care (Health Homes, Patient-Centered Medical Home, ACOs, DSRIP) and what they | Care Coordination Fundamentals: Module 2, 1199SEIU TEF and PCDC |
<table>
<thead>
<tr>
<th>have in common</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Understand the basics of PCMH standards as it related to care coordination</td>
</tr>
<tr>
<td>• Understand the difference between home care and health homes</td>
</tr>
<tr>
<td>• Understand how a value-based purchasing/pay for performance payment model differs from traditional fee for service</td>
</tr>
<tr>
<td>• Understand the differences between individual vs. population health</td>
</tr>
</tbody>
</table>
**CORE COMPETENCY 2: Interdisciplinary Teams**

**Module Overview:** This module reviews the importance of delivering care as a part of an interdisciplinary team. It focuses on the various positions and roles of care team members and why frequent and clear communication across team members is critical to delivery patient-centered quality care. It teaches students to be productive and contributive members of care teams and provides strategies for conflict resolution when necessary.

**CORE COMPETENCY 4: Chronic Disease and Social Determinants of Health**

**Module Overview:** This module reviews the major chronic diseases and the implications of poor chronic disease management on patients and our healthcare system. It teaches students tools and strategies to help patients thrive by reviewing both chronic disease care and the social determinants that affect health outcomes. It includes a basic overview of the major chronic conditions. Programs should explore in greater detail conditions relevant to the students’ occupations and work settings.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Learning Objectives (Students will be able to…)</th>
<th>Resources</th>
</tr>
</thead>
</table>
| Chronic disease and comorbidities (part 1) | • Understand what a chronic disease is, the prevalence of it in the U.S., and how it relates to our healthcare system  
• Understand the basics of diabetes, cardiovascular disease, asthma, cancer (breast, colon, cervical), mental illness, cognitive impairment/dementia, depression, substance use/addiction, and HIV/AIDS  
• Understand stigmas often associated with these chronic conditions | Care Coordination Fundamentals: Modules 3, 4, 5, 6, 1199SEIU TEF and PCDC  
A Community Health Worker Training Resource for Preventing Heart Disease and Stroke, CDC |
| Chronic disease and comorbidities (part 2) | • Identify behaviors and risk factors related to diet, exercise and smoking that impact chronic disease  
• Know the appropriate team member to report changes in behavior/condition | Resources: Behavior Change, AACH |
| Social determinants of health              | • Define social determinants of health  
• Understand determinants that may affect a patient’s health (such as gender, race, class, ethnicity, and place of residence) | Transforming Health Systems: Module 2, World Health Organization (WHO)  
Social Determinants of Health Learnings and Tools, WHO  
Introduction to Social Determinants of Health, University of Michigan School of Public Health |
| Self-management                            | • Understand what patient self-management looks like  
• Know available and relevant tools to assist patients with self-management | Chronic Disease Self-Management Program- Evaluation Tools, Stamford Medicine |
| • Be able to help patients talk to their doctors and prepare them for medical visits | Transforming Practices into Medical Homes: Self-Management Support in the PCMH, Safety Net Medical Home Initiative |
| | IMPACT Model Toolkit, AIMS Center, University of Washington |
| | Resources for Screening, Brief Intervention, and Referral to Treatment (SBIRT), Substance Abuse and Mental Health Services Administration |
**CORE COMPETENCY 5: Cultural Competence**

**Module Overview:** This module reviews the growing importance for healthcare delivery to meet the diverse cultural needs of New Yorkers. It teaches healthcare workers to assess and incorporate cultural preferences and needs of individuals and families into a comprehensive care plan, predominantly through culturally competent communication. It also teaches students to recognize and assess personal biases and handle them appropriately.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Learning Objectives (Students will be able to…)</th>
<th>Resources</th>
</tr>
</thead>
</table>
| Recognizing patients’ and families’ cultural needs/factors that may affect their choices or engagement | • Define cultural competence, cultural awareness, and cultural sensitivity  
• Describe how personal bias and culture can impact the way people interpret illness and interact with the medical system  
• Identify your own biases and how they affect your role as a healthcare worker | Care Coordination Fundamentals: Module 7, 1199SEIU TEF and PCDC  
Learning Modules, National LGBT Health Education Center  
OMH Minority Health eResources, HHS  
Resources: Culture, AACH  
| Communicating with patients and families in a culturally competent manner | • Describe effective interviewing skills to better understand a patient’s culture | Care Coordination Fundamentals: Module 7, 1199SEIU TEF and PCDC  
National Heart, Lung, and Blood Institute: Selected Audiences Resources, HHS  
BE SAFE: A Cultural Competency Model for African Americans (HRSA), National Minority AIDS Education and Training Center  
Road to Health Toolkit: African Americans and Latino Populations at Risk for Type 2 Diabetes, CDC |
| Resources: Cultural Competence, New York Association of Psychiatric Rehabilitation Services |
| Cultural Competence Curriculum, Center of Excellence in Culturally Competent Mental Health |
**CORE COMPETENCY 6: Ethics and Professional Boundaries**

**Module Overview:** This module reviews general healthcare ethics and professional boundaries. It focuses on making sure that healthcare workers understand how to make ethical decisions and why professional boundaries are integral in healthcare. This module should be tailored to better prepare students for situations they may face in their specific occupations and work environments.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Learning Objectives (Students will be able to…)</th>
<th>Resources</th>

</thead>
</table>
| Ethical and responsible decision-making  | • Identify a framework for ethical decision making  
• Be familiar with and know the purpose of the patient's bill of rights                                      | [Care Coordination Fundamentals: Modules 2, 23, 24, 1199SEIU TEF and PCDC] |
| Professional boundaries                  | • Understand personal and professional boundaries and why they are important  
• Describe the role personal and professional boundaries have in creating positive relationships with patients and teammates  
• Understand appropriate boundaries with social media while working with patients  
• Understand risky behaviors that lead to boundary violations  | [Care Coordination Fundamentals: Modules 23, 24, 1199SEIU TEF and PCDC]  
[A Nurse’s Guide to Professional Boundaries, National Council of State Boards of Nursing (NCSBN)]  
[A Nurse’s Guide to the Use of Social Media, NCSBN] |
CORE COMPETENCY 7: Quality Improvement

Module Overview: This module focuses on empowering healthcare workers to meaningfully partake in the quality improvement process. It teaches students methods and tools used to measure quality improvement and evaluate performance and strategies to participate in the process.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Learning Objectives (Students will be able to…)</th>

                              | • Understand what key data points are used to measure quality improvement and evaluate performance | Care Coordination Fundamentals: Module 22, 1199SEIU TEF and PCDC  
                              |                                                                                 | Quality Measure Tools & Resources, AHRQ  
                              |                                                                                 | INTERACT Tools, Interventions to Reduce Acute Care Transfers |
**CORE COMPETENCY 8: Community Orientation**

**Module Overview:** This module helps students understand how to access and connect with organizations in their patients’ communities. It teaches healthcare professionals how to refer patients to appropriate resources to meet their holistic needs.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Learning Objectives (Students will be able to…)</th>
<th>Resources</th>
</tr>
</thead>
</table>
| Connecting patients and families to community resources | • Identify key community-based resources to provide support for care coordination services and understand the collaborative role of community support services  
• Identify and use resource guides (i.e. directories) to find support services relevant to patient diagnosis and needs  
• Understand the roles of healthcare workers in helping patients and their families access available local resources | Care Coordination Fundamentals: Module 10, 1199SEIU TEF and PCDC  
Health Information Tool for Empowerment (HITE), Greater New York Hospital Association |
| Supporting families as they seek resources in the community | • Demonstrate effective skills and strategies for working with community agencies  
• Describe the tools that healthcare workers can use to help patients access needed resources  
• Understand the importance of follow up with patients after providing resources | Care Coordination Fundamentals: Module 10, 1199SEIU TEF and PCDC  
Self-Management Support Module, HHS |
**CORE COMPETENCY 9: Technology, Documentation, and Confidentiality**

**Module Overview:** This module provides students with a general understanding of the importance of technology, documentation and confidentiality guidelines across healthcare settings. While HIT systems and software vary by institution and setting, students should have a basic level of computer literacy and knowledge of how to properly record patient information. It is recommended that trainings cater this module to teach the skills relevant to their students’ occupations and work settings.
